

POM POM TUBE DROP TODDLERS

Supplies Needed:

- Assorted color pom-poms
 - or other things that fit through tube
- Painter's Tape
- Empty paper towel and/or toilet paper rolls

What to do:

1. Find an empty spot on the wall at your child's height and arrange tubes vertically and/or diagonally and tape them.
 - align some so that the pom-pom falls from one tube to another
2. Show your child how to put the pom-pom into the tube and watch it drop through the tubes.
 - teach them to use a pincer grasp (thumb and pointer finger)- this helps with their fine motor skills.

Make it More Complex:

- Have your child paint the tubes before you tape them to the wall based on the colors of your pom-poms/other objects.
 - have them coordinate the color of the pom-pom to the color of the tube
- Have your child sort and count the pom-poms/object by color
