

BACKYARD CAR WASH TODDLERS

Materials:

- Empty plastic tub/bucket
- Soap (child safe)
- Water
- Sponge or rag
- Plastic/water resistant toy cars, trucks, tractors, wagons, bikes, etc.

What to do:

1. Fill the tub with water and soap and set them up in an area of your yard that is fine to get water/soap on it
2. Have them gather their "dirty" toys, cars, tractors, bikes, wagons, etc. and bring them to the car wash area
3. Hand them the sponge/rag and let them get to cleaning
4. Once they have cleaned everything with the soapy water, turn on the hose and let them rinse everything off (caution- you will likely get wet)
5. Once all of the soap is rinsed off have them dry off the items
